Art Unit: 1621

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-25, drawn to polyamine compounds, classified in class 514, subclass 654+.
- II. Claims 26-30, drawn to processes of preparing polyamine compounds, classified in class 564, subclass 374+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the compounds could be made by alkylating a polyamine with an aralkylhalide.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicants are further required to elect a single disclosed species, i.e. a single disclosed compound, if group I is elected.

A telephone call was made to Mr. Steinberger on or about 7 December 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1621

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Peter G O'Sullivan at telephone number (571)272-0642.
